Community Mainstreaming Associates	PF&I Imma House Improvements	Infrastructure	The Irma House id a 3100sq. ft. two-story brick building with a full basement and attic. At one point the home was converted from a two-family house to single family use. The house has ten bedrooms and five bathrooms and currently is a group residence for ten men and women. Starting in 2016, CMA began several renovation projects including: completely updating an upstairs bathroom, renovating the kitchen, and replacing the roof, which was funded by the 2016 CBDG. Although the residents in the home each have a private bedroom, their communal space is quite limited. The intent of this funding request is to remove the dividing wall in the main living space, which dates back to when the house was a two-family structure. CMA would use the CDBG grant to make significant changes to the main floor, including removal of interior and partition walls and cast iron radiators and installation of a new support beam, construction of a private medication room and installation of new baseboard heating, flooring, and electrical rewiring and lighting.	$25,000.00	570.201(c)	570.208(a)(2) Low/Mod Limited Clientele (Presumed Benefit - severely disabled)	Disabled People	10	1025 Old Country Rd, Westbury, NY 11590
