EXHIBIT "A"

DETAILED SCOPE OF SERVICES

The services to be provided may include, but are not limited to, the following:

1. **Wastewater Treatment Process:** Firms may be requested to assist Department staff with treatment process related difficulties. Given the importance of maintaining treatment at a level consistent with adherence to the plant's State Pollutant Discharge Elimination System (SPDES) permit specialized knowledge and access to such expertise will at times be required. The firm's own employees (as submitted in the RFP) can be used but provisions will be incorporated for use of additional experts.
2. **Code or Compliance Issues:** The complexity of treatment plants (and similar environmental facilities), which encompass a wide variety of work activities and conditions, pose numerous challenges to their employees and management as they are governed by numerous federal, state and local codes, rules and regulations. It is the goal of the Department to ensure adherence to all the applicable rules and regulations. At times it may be necessary to request the services of qualified and recognized experts in certain fields (such as those knowledgeable of Title V air permitting, OSHA regulations, etc.) especially with regard to their implementation in wastewater treatment plants.
3. **Process Control:** The plants are continually being improved and as such new processes and equipment are intermittently being integrated into the plant's operating scheme. The firm might be requested to furnish an individual to assist the plant staff in the start-up of such new processes and/or equipment. The duties will include coordination with all affected parties (the plant, construction, contractors and design engineers). The firm's representative will act as the liaison between the respective parties to ensure a continuity of effort. Included will be the incorporation of any new information into the plant's overall operations and maintenance manual. Any new additions to the manual must follow the exact format as the existing. A representative of the firm may also be requested to provide supplementary training with respect to processes and/or equipment in conjunction with that furnished by the various contractors and/or equipment vendors and suppliers.
4. **Specialized Equipment Knowledge:** Given the complexity of new equipment being integrated into the plant/facility as result of new construction or normal upgrades, specialized knowledge of a particular item might be lacking until such time as Department employees become familiar with the equipment and have accumulated some operational experience. While the requisite knowledge is developing the firm may be requested to furnish a qualified individual to assist the County during this interim period. Such an individual might help instruct and provide insight to County employees so that disruptions might be forestalled and not place adherence to the SPDES Permit in jeopardy.
5. **Design Services:** The Firm may be required to complete design documents (and any related construction period services) so as to correct a process/system deficiency that impacts process, codes, etc. The Firm would be required to provide the names of a design team, their wage rates, resumes, etc., a schedule/cost for completing their services and an estimate of the construction costs. The Firm would be directed to complete such design work in a format suitable to the Department's designated method of contracting the work (public bid, purchase order, requirement's contract work order, etc.). Such documents would require a Professional Engineer's (P.E.) seal and signature.

Division A Services – Condition Assessment

Evaluate the condition of the existing facility and equipment to identify necessary repairs and improvements to bring the system's components into a state of good repair and compliance within applicable codes and standards. The Firm shall provide an independent evaluation and shall incorporate the same in the Technical Design Report (TDR). The Firm shall evaluate and present new technologies, as applicable, which will improve the operating efficiency of the system. The evaluation shall, at a minimum, encompass the following:

- Review of available documents such as sewer maps, original drawings, GIS data, reports, etc.
- Site survey (visual inspection, measurements, photographs and data collection in general).
- Hazardous Materials survey (Lead Based Paint, asbestos, PCB, mercury, etc.).

Preparation of Technical Design Report

Prepare a Technical Design Report (TDR) to include the following:

1. Description of existing conditions and deficiencies identified by the Firm during the condition assessment and interviews with staff responsible for system operation & maintenance.
2. Discussion of system modification options based on modern standards and guidelines.
3. Evaluation of each option's associated capital costs, operational costs, efficiency, maintenance and serviceability considerations, and expected life.
4. Recommendations of an option and basis for the recommendation.
5. Schematic design, listing design criteria and basis for design including calculating potential flow within the collection area and any additional flow from anticipated development within the area.
6. Identification and descriptions of studies, tests, technical surveys, etc. which will be required to determine the final design, along with the estimated cost and timing of such studies.
7. Coordination with other design or construction activities that may be ongoing at an undefined time.
8. Proposed approach to maintaining facilities operations during construction.
9. Preliminary design and construction schedule.
10. Preliminary construction cost estimate.

Provide six (6) copies of the draft TDR for review by NCDPW. Meet and confer with NCDPW and others as/if necessary, to discuss the parameters of the design and review comments on the draft TDR. Finalize the TDR incorporating any revisions and provide six (6) paper copies and an electronic (*.PDF format) copy of the TDR.

Division B Services - Detailed Design

Upon County approval of the technical design reports, the Firm agrees to perform all the usual and necessary design services in connection with the preparation of detailed contract drawings, specifications and estimates of the project suitable for public bidding. It is anticipated that the project will be bid as a single project.

5. Submit three (3) copies of a detailed construction cost estimate with each of the milestone design submissions (at 40%, 75% and 100% design completion). The cost estimate will have a breakdown by CSI division for each cost item in the estimate.
6. Prepare and submit the necessary Environmental Impact Forms.
7. Prepare permit applications, reports or submittals required by other agencies having jurisdiction. This work task will not be considered complete until it culminates in a permit or pre/post design approval by the appropriate agency or agencies. The Firm must be aware of the latest applicable codes and agency procedural requirements in order to expeditiously complete this design task. Correspondence shall be submitted directly to the agency for review/approval with at least two copies to the County, unless otherwise directed. Typical regulatory agencies involved in our Environmental Engineering Projects may include but will not be limited to the following:
 - a. New York State Department of Environmental Conservation- Title V Plant-wide Emission Source Update Submittals permits, SPDES General Permit-02 for runoff from construction sites
 - b. Nassau County agencies- Fire Marshal and/or Health Department

c. Other Local agencies (Towns, Villages...)

8. Submit written responses to all County review comments.
9. Review the County's Master Project Labor Agreement and undertake a feasibility study to determine whether it would be in the County's best interest to incorporate this project under the terms of the PLA, and if warranted, prepare the addendum to add the project to the PLA and subsequently oversee the execution of the same by the responsible parties.
10. Make periodic site visits as necessary for a complete understanding of the system operation.
11. Submittal of bid plans and a master specification book. The Firm shall have the required number of sets of bid documents printed without the assistance of the County.
12. Review all comments and/or questions posed by prospective bidders.
13. Prepare all necessary addenda to the contract documents.
14. Review all bid proposals received and provide a written recommendation regarding award of the construction contracts.
15. If requested, the Firm will provide copies of any and all design calculations.

If the total amount of the lowest responsible construction bids should exceed the final approved construction cost, which is based on the Firm's final construction cost estimate, by more than fifteen (15) percent, the County may require the Firm to revise the plans, at no additional cost to the County, so as to stay within the final approved estimated cost of construction. The Firm is responsible for obtaining construction budget information from the County.

In preparing the contract specifications, the County shall furnish the Firm with a copy of the standard contract "Front End" consisting of the Notice to Bidders, Instructions to Bidders, Agreement and General Conditions. The Proposal Forms, Special Conditions (Division 1) and all other sections of the technical specifications shall be developed by the Firm. The specifications shall be written following the CSI format.

16. PSEG Long Island Commercial Efficiency Program:
PSEG Long Island offers a rebate to customers who install variable frequency drives and other energy saving equipment. Should this rebate be available upon completion of this Project design, the Engineer shall coordinate the potential rebate with PSEG on behalf of the County and provide any information necessary. The County is interested in maximizing the use of available PSEG rebates through the Project Design.

11. Witness and provide a written report on shop tests for all major equipment.
12. Provide consultation on special construction problems by specialists in specific fields of work.
13. Assist the County in the final inspection of the work to determine if each construction contract has been completed in accordance with the contract documents. Provide written certification that project completion was in accordance with the contract documents.

14. Throughout the construction period and at the completion of the construction activities, field verify and check the Prime Construction Contractors' Record Drawings on which the Prime Construction Contractors have indicated changes in the construction work as-built to the extent possible based on the Firm's periodic site visits. This task shall include, but not be limited to the following:

Division D- Facility Operation and Maintenance Manual

Under this division of work, the Firm shall compile and prepare an Operation and Maintenance Manual ("O&M Manual") for each site, using the EPA Publication, "Considerations for preparation of Operation and Maintenance Manuals (EPA-430/9-74001)" as a guideline.

The O&M Manual provides a detailed description of the facilities, process control strategies, start-up and shutdown procedures, test procedures, emergency response procedures, safety guidelines, troubleshooting procedures, equipment preventive maintenance schedules as well as process flow schematics, isometric figures, cross section and plan diagrams, valve schedules, single line diagrams, and miscellaneous tables.

The completion of the appropriate O&M Manual sections will coincide with each segment of construction. A draft version of the O&M manual sections will be submitted for County review and approval prior to payment for the 90% completion point in construction. A final version of the O&M manual sections will be submitted for County review and approval at the 100% construction completion point to incorporate issues learned during startup. The final O&M manual sections will be supplemented with cataloged and bound copies of the approved equipment manufacturers' O&M Manuals.

Six (6) copies of the draft O&M Manual Sections will be submitted for County review. Two (2) copies of the electronic files (both text and graphics) used to produce the manuals will be turned over to the County. In addition, two (2) hard copies (bound) of the final O&M Manual Sections will be submitted for County review and approval. The County requires compatibility of software as described in the subsequent paragraph.

Prepare and provide to the County, Standard Operating Procedures (SOPs) to assist Operating Staff in the routine operation, maintenance and monitoring of all key components of the Project. Start-up assistance during the first year of operation will be provided on a reasonable "on-call" basis for troubleshooting, debugging, cost-effective process optimization, and general startup supervision. Services to be provided include:
 - d. Strategic Start-Up Plan. This plan is designed to delineate major and minor events expected when placing into operation equipment installed in connection with the Project. The Start-up Plan shall identify specific plant components and unit processes that will affect each other and establish a network of related steps that will lead to a logical and smooth start-up. The strategic Start-up Plan shall also define the roles and responsibilities of the participants (County, Firm and construction Firms). This plan shall be reviewed with the County. Emphasis throughout the start-up will be on the O&M responsibilities of the plant staff to ensure protection of equipment warranties.

Start-up procedures shall contain complete information pertaining to control of the equipment and process trains associated with the Project.

- f. Checklists, Logs, Records and Reports. Although various checklists and plant operating logs are in use, the Firm shall, if necessary, upgrade the system by reviewing existing shift checklists, operating logs, records and reports for all processes affected by the inclusion of the Project. The Firm shall provide recommendations for upgrading existing record-keeping, checklists and logs for all components associated with these systems and develop new checklists and logs for new or modified plant processes.

(k) A Contractor shall maintain Documentation Demonstrating Best Efforts to Obtain Certified Minority or Women-owned Business Enterprises for a period of six (6) years. Failure to maintain such records shall be deemed failure to make Best Efforts to comply with this Appendix EE, evidence of false certification as M/WBE compliant or considered breach of the County Contract.

(l) The Contractor shall be bound by the provisions of Section 109 of Local Law No. 14-2002 providing for enforcement of violations as follows:

If the contractor has not received a satisfactory evaluation, the department must explain why the contractor should nevertheless be permitted to contract with the county.

In certain limited circumstances, conducting a competitive process and/or completing performance evaluations may not be possible because of the nature of the human services program, or because of a compelling need to continue services through the same provider. In those circumstances, attach an explanation of why a competitive process and/or performance evaluation is inapplicable.

VII. ☐ This is a public works contract for the provision of architectural, engineering or surveying services. The attached memorandum provides details of the department's compliance with Board of Supervisors' Resolution No. 928 of 1993, including its receipt and evaluation of annual Statements of Qualifications & Performance Data, and its negotiations with the most highly qualified firms.

COUNTY OF NASSAU
DEPARTMENT OF PUBLIC WORKS
Inter-Departmental Memo

TO: Office of the County Executive
Att: Brian J. Schneider, Deputy County Executive

FROM: Department of Public Works

DATE: September 1, 2020

SUBJECT: Proposed Personal On-Call Service Agreement
Recommendation of Firms for Professional Engineering Services
Environmental Facilities On-Call Design
Project ID No. S37860-04X

This Department intends to procure “On-Call” Professional Engineering Services for Environmental Facilities On-Call Design. The services typically provided under an “On-Call Professional Engineering Services agreement include but are not limited to, providing studies, analysis, surveys, AutoCAD drafting, design and cost estimating on an as needed basis for various Environmental Facility projects, as well as other related specialized services. The scope of services required for a particular project will be identified and described in writing in a “Task Order” and distributed to the qualified firms for consideration.

Firms were requested to submit technical and cost proposals in accordance with the Department’s Request for Proposals (RFP) dated February 28, 2020. The RFP was prepared in accordance with the Countywide Procurement & Compliance Policy for assessing technical understanding, statement of qualifications, and proposed project schedule. The RFP was posted on the County’s website *eProcure*, advertised in *Newsday*, and the *Contract Reporter*.

Technical and cost proposals were received from five (5) firms on March 27, 2020, in response to this RFP. The proposals were evaluated by both registered professional engineers and other personnel within the Department of Public Works: Vincent Falkowski PE, Deputy Commissioner for Environmental Programs, Christopher Vella, Construction Inspector II, Edward Visone, Assistant Superintendent of Sanitary Construction, Karen Fay PE, Sanitary Engineer III.

After tabulating the combined technical scores and establishing ranking order as per the below attached table, it was determined through discussion between the evaluation committee members that all the firms are technically qualified to be awarded this contract. It should be noted that no specific scope of services was requested with this RFP since the services are of an “on-call” nature. A cost proposal in the form of a multiplier was received from the firms along with a maximum rate which will not exceed \$225.00 per hour.

The Department recommends that all five (5) firms listed below be retained for S37860-04X Environmental Facilities On-Call Design Services.

The results of the technical evaluation are as follows:

FIRM(S)	RANK	TECHNICAL SCORE	MAXIMUM RATE	MULTIPLIER %
Gannett Fleming	1	84.25	\$225.00	2.75
CDM Smith	1	84.25	\$225.00	2.75
H2M	3	83.50	\$225.00	2.75
Cameron	4	79.00	\$225.00	2.75

Instructions for Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.
3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
