Storms like Hurricane Sandy not only threaten the areas critical infrastructure, but also, due to subsidence, inundation, and storm surge, impact the ability of individual septic tanks to properly operate. The cost proposals for top four technically ranked firms were opened and recorded. D&B was selected based on low cost the technical ability, and the County was proceeding with the award. Subsequently, D&B has withdrawn their bid. The selection committee met again and determined that Cameron had the next lowest cost and high technical rating and better BAFO response than remaining firms. RFP Evaluation Committee: Chris Vella - Construction Inspector II, Karen Fay, PE - Sanitary Engineer III, Vincent Falkowski, PE - Deputy Commissioner DPW, Edward Visone - Assistant Supt Sanitary Construction.

Task 1: Mobilization

The Firm will begin work after attending a kickoff meeting with the County and PM-JV. Work will proceed continuously until all project tasks are completed. The Firm will provide a proposed project schedule for the County’s approval which accommodates all deliverables. A summary of the intended means and methods for completing the Scope of Work will be submitted for review and approval no later than fourteen (14) days from the kick-off meeting.

Preparation of a study, sampling, and survey schedule as part of the overall Work Breakdown Structure (WBS) schedule for the Assignment, based upon a robust development strategy identifying technical and other milestones and their interrelation to define a critical path for the development of this Assignment and that of other associated projects. While this implementation schedule will need to be updated as the Assignment progresses, this preliminary version shall include the majority of activities that will be required and is intended to be used to guide the County’s efforts.

Prior to and during the course of the work, The Firm should be aware that there will likely be interaction with other firms and agencies. The Firm is expected to be collaborative and answer any questions as necessary.

The Firm shall facilitate progress meetings, provide progress reports, and coordinate with the PM-JV monthly, at a minimum, over the duration of the Assignment.

The Firm shall participate in meetings with the PM-JV, County, Long Beach Department of Public Works, and others, as needed to provide status updates, obtain information, and support decision-making relevant to the Assignment.

1. Health and Safety Plan

All operations will be in accordance with all applicable City, State, and Federal agencies and regulations, including, but not limited to, Occupational Safety and Health Administration (OSHA), National Institute of Occupational Safety and Health (NIOSH), New York State Department of Labor (NYDOL). The firm shall prepare and submit a health and safety plan that is compliant with the aforementioned agencies. The Plan will be stamped and signed by a New York State Licensed Professional Engineer (PE).

 - g. Review legal requirements and options for district formation
 - h. Prepare initial documents and costs per parcel to formally establish a Sewer District

Task 3: Site Investigation

1. Background Research

The Firm shall complete a thorough, systematic, and comprehensive investigation over the entire project area. The Firm shall analyze and document the utility infrastructure of the existing septic system and immediate surroundings and note any signs and types of defects, distress, deformation, and/or deterioration. The Firm shall prepare measured plans of existing conditions. Include a minimum of a site plan, sections, and details necessary to visually convey conditions.

The investigation shall include a comprehensive mapping the individual properties to be serviced by the new conveying system. All septic system shall be identified so that the design team can determine the best location for the connection of each household and/or businesses, including the following:

The objective of this task is to identify environmental hazards that may be present, to describe their location, and to quantify their extent. The potential presence and extent of onsite environmental hazards may present challenges, including mitigation cost and potentially complex site remediation. Quantification of hazards, if any, may be used to determine the various options/viability of project alternatives.

The Firm shall submit a recommended sampling and testing scheme for approval by the County and PM-JV prior to the start of work. The presence of hazardous materials will impact the cost of the future project. Before samples are taken, the Firm shall submit for approval the name of a State certified environmental testing laboratory that has the facilities to perform tests.

A summary report shall be prepared including data package, complete with professional interpretation, analysis and recommendations.

Task 5: Design and Construction Options

1. Develop Design and Construction Options

- c. Work with the attributes and challenges of the Site

The alternatives must include, but are not limited to:

- a. No action
- b. Conversion of the septic system to a sewage collection system using vacuum sewers

The Firm shall provide a timeframe for the community's residents to disconnect their septic tanks and utilize the sewage collection system.

In the estimates for all alternatives, include:

- costs to abandon existing utilities (septic tanks) and piping
- remediation costs for the septic tank areas, if required
- maintenance of traffic (MOT) costs
- costs to restore all impacted roadways to original state

- costs to use existing and new piping
- life cycle costs
- operations and maintenance costs

The feasibility study shall include all the information listed in all tasks. The Firm shall also provide a list of potential permits (Federal, State, and Local permits) to support construction, and a list of stakeholders. The Firm shall provide a community outreach plan.

2. Select and Develop Optimal Alternative

The directive here is to select and further develop a preferred alternative and create a presentation based on that plan to be potentially used for display to local government officials, community groups, and other organizations. Based on a review of the proposed alternatives, the County and PM-JV will determine which of the concepts is best suited for further development.

Schedule and Deliverables

The time allowed for the completion of this assignment is twelve (12) calendar months for a final feasibility study with draft feasibility study submission at six (6) calendar months from the start of work.

During the development period, the Firm shall prepare for and attend biweekly review meetings to review the job progress and to resolve design and other related questions. In addition, Local Law No. 14-2002, entitled "Participation by Minority Group Members and Women in Nassau County Contracts," governs all County Contracts as defined herein and solicitations for bids or proposals for County Contracts. In accordance with Local Law 14-2002:

(a) The Contractor shall not discriminate against employees or applicants for employment because of race, creed, color, national origin, sex, age, disability or marital status in recruitment, employment, job assignments, promotions, upgradings, demotions, transfers, layoffs, terminations, and rates of pay or other forms of compensation. The Contractor will undertake or continue existing programs related to recruitment, employment, job assignments, promotions, upgrading, transfers, and rates of pay or other forms of compensation to ensure that minority group members and women are afforded equal employment opportunities without discrimination.

(b) At the request of the County contracting agency, the Contractor shall request each employment agency, labor union, or authorized representative of workers with which it has a collective bargaining or other agreement or understanding, to furnish a written statement that such employment agency, union, or representative will not discriminate on the basis of race, creed, color, national origin, sex, age, disability, or marital status and that such employment agency, labor union, or representative will affirmatively cooperate in the implementation of the Contractor's obligations herein.

- (c) The Contractor shall state, in all solicitations or advertisements for employees, that, in the performance of the County Contract, all qualified applicants will be afforded equal employment opportunities without discrimination because of race, creed, color, national origin, sex, age, disability or marital status.
- (d) The Contractor shall make best efforts to solicit active participation by certified minority or women-owned business enterprises ("Certified M/WBEs") as defined in Section 101 of Local Law No. 14-2002, for the purpose of granting of Subcontracts.
- (e) The Contractor shall, in its advertisements and solicitations for Subcontractors, indicate its interest in receiving bids from Certified M/WBEs and the requirement that Subcontractors must be equal opportunity employers.
- (f) Contractors must notify and receive approval from the respective Department Head prior to issuing any Subcontracts and, at the time of requesting such authorization, must submit a signed Best Efforts Checklist.
- (g) Contractors for projects under the supervision of the County's Department of Public Works shall also submit a utilization plan listing all proposed Subcontractors so that, to the greatest extent feasible, all Subcontractors will be approved prior to commencement of work. Once a final determination of failure to comply has been reached by the Executive Director, the determination of whether to terminate a contract shall rest with the Deputy County Executive with oversight responsibility for the contracting agency.

Provisions (a), (b) and (c) shall not be binding upon Contractors or Subcontractors in the performance of work or the provision of services or any other activity that are unrelated, separate, or distinct from the County Contract as expressed by its terms.

This project aims to convert over 500 residential & commercial septic systems to a sewage collection system connected to the LB WPCP. Storms like Hurricane Sandy not only threaten the areas critical infrastructure, but also, due to subsidence, inundation, and storm surge, impact the ability of individual septic tanks to properly operate. _____[describe procurement method, i.e., RFP, three proposals evaluated, etc.] Attach a copy of the most recent evaluation of the contractor's performance for any contract to be renewed or extended. For any such contract, where the vendor has previously provided services to the county, attach a copy of the most recent evaluation of the vendor's performance. If the contractor has not received a satisfactory evaluation, the department must explain why the contractor should nevertheless be permitted to contract with the county.

In certain limited circumstances, conducting a competitive process and/or completing performance evaluations may not be possible because of the nature of the human services program, or because of a compelling need to continue services through the same provider. In those circumstances, attach an explanation of why a competitive process and/or performance evaluation is inapplicable.

VII. ☐ This is a public works contract for the provision of architectural, engineering or surveying services. The attached memorandum provides details of the department's compliance with Board of Supervisors' Resolution No. 928 of 1993, including its receipt and evaluation of annual Statements of Qualifications & Performance Data, and its negotiations with the most highly qualified firms.

Firms were requested to submit technical and cost proposals in accordance with the Department's Request for Proposals (RFP) dated February 7, 2020. The RFP was prepared in accordance with the Countywide Procurement & Compliance Policy for assessing technical understanding, statement of qualifications, and proposed project schedule. The RFP was posted on the County's website *eProcure*, advertised in *Newsday*, and the *Contract Reporter*.

Technical and cost proposals were received from five (5) firms on March 6, 2020, in response to this RFP. The proposals were evaluated by both registered professional engineers and other personnel within the Department of Public Works: Vincent Falkowski, Deputy Commissioner of Environmental Programs, Christopher Vella, Construction Inspector II, Edward Visone, Assistant Superintendent of Sanitary Construction, Karen Fay, Sanitary Engineer III.

After tabulating the combined technical scores and establishing ranking order as per the below table, it was determined that H2M, D&B, Gannett Fleming, and Cameron were ranked as the most qualified firms. These firms received the highest ranking because they had a good understanding of this project, they proposed the most competent team, the best staffing schedule, and have proven experience managing similar projects. For these reasons, we believe any of these 4 firms can successfully deliver this project. Next the cost proposals were opened and recorded for only the top four (4) highest technically ranking firms. P.W Grosser was not considered due to their significantly lower technical score. Gannett Fleming, who was technically ranked 3, was eliminated from consideration since their original cost proposal was more than double the cost of the other qualified firms. It was determined to request Best and Final Offers (BAFO) prior to considering holding discussions with the proposers. The committee agreed to ask H2M, D&B, and Cameron to submit their Best and Final Offer (BAFO). The Proposed Cost listed in the table below reflects the BAFO offers of those three (3) firms.

The results of the technical evaluation and BAFO proposed costs are as follows:

FIRM(S)	RANK	TECHNICAL SCORE	PROPOSED COST	PROPOSED COST w/ CONTINGENCY
H2M	1	82.75	\$416,580.00	\$541,554.00
D&B	2	80.75	\$320,000.00	\$416,000.00
Gannett Fleming	3	80.50		
Cameron	4	80.00	\$354,700.00	\$461,110.00
P.W Grosser	5	72.00

February 7, 2023 Recommendation of Firm for Professional Engineering Services

Page 2 Point Lookout Sewer Service Feasibility Study

Subject: Project ID No. S33994-01D

BAFO responses were received from the firms on April 30, 2020. D&B's BAFO cost of \$320,000.00 (\$416,000.00 with contingency) was the lowest of the other two (2) qualified firms who submitted BAFO's. D&B had no further comment and no technical questions were asked of them in the BAFO request. In addition, as per the Countywide Procurement Policy, a specified method for comparing proposals is to score them in terms of price per technical evaluation point and to select the proposal that has the lowest cost per technical evaluation point. This method resulted in H2M's price per point \$5,034, Cameron's price per point \$4,434, and D&B's price per point was the lowest at \$3,963. Due to the significant disparity between price per point values, discussions with the firms were considered unnecessary. D&B was selected based on cost and technical ability and the County was proceeding with the award. Subsequently, D&B has withdrawn their bid.

The Selection Committee met again on January 19, 2023, to discuss course of action and review the notes and comments from the prior meeting conducted on May 6, 2020. Previous discussion eliminated both Gannett Fleming and P.W. Grosser for award consideration due to the Gannett Fleming's high cost and P.W. Grosser's low technical score. This left only Cameron Engineering and H2M Architects. After reviewing notes and comments from each committee member it was reiterated that H2M was nonresponsive to comments made by DPW in the previous BAFO request letter. This left Cameron Engineering as the only other firm for consideration of award. The Committee agreed that Cameron should be awarded this contract due to them having a lower cost and better response than H2M in what was asked in the BAFO letter. This recommendation was contingent on Cameron holding their previously submitted BAFO cost. Subsequently, a meeting was held with Cameron on January 30, 2023, in which Cameron agreed to hold the original BAFO price.

In our professional judgement, the proposal submitted by Cameron Engineering receiving a high technical ranking and low proposed cost provided the best value to Nassau County. As such, it is the department's recommendation that Cameron Engineering and Associates be retained to provide Professional Engineering Services for the Point Lookout Sewer Service Feasibility Study project.

Cameron is a local firm having extensive experience in the wastewater field with Nassau County and other various municipalities in the New York Metropolitan area. Cameron's local office is in Woodbury, NY.

Funding for these Engineering services is available under Capital Project No. S33994. In accordance with procedural guidelines, CSEA has been notified of this proposed agreement.

Please signify below if you approve or disapprove of our recommendation, after which we will implement the next appropriate Departmental procedure(s).
