Re: CNC Managing Partners Adverse information

In reviewing the Business History Form it was brought to our attention that there were potential claims within the last five years.

CNC is engaged in litigation against former Director Clayton Thom and his company, Amrezi LLC, through which Thom previously held a membership interest in CNC. CNC vs. Thom alleges Thom fraudulently transferred company funds and concealed the transactions. The case, filed on August 3, 2021, is ongoing. CNC is also pursuing a nondischargeable debt claim (filed on May 9, 2022) in Thom's pending bankruptcy case.

We then reached out to the vendor for updated information concerning the ongoing case. Please see the summary/update from the vendor's attorney.

After a multi-year investigation, on November 1, 2023, the California Attorney General's Office filed felony counts of grand theft, elder theft, and tax fraud against Clayton Thom as the owner of CNC Motors. Although Thom was previously an owner of CNC Technologies, this case does not concern any actions on Thom's part relating to CNC Technologies. While CNC is not privy to the CA AOG's investigation of the underlying facts, the investigation is presumably ongoing. CNC terminated Thom in August 2021 and he has not been affiliated with CNC Technologies in any capacity since that time.

We also requested what controls the company has implemented so this does not happen again. Please see reply below.

Regarding the controls put into place to make sure this doesn't happen again, it should be note that along with Thom, CNC terminated the CFO that was acting at the time. CNC Technologies has also strengthened its financial controls. The Director of Finance is the only employee with access to financial information, reporting directly to the two Managing Partners. Past and upcoming transactions are reviewed on a weekly basis with one or more of the owners for accuracy. CNC's bank further notifies the Managing Partners as to each electronic transaction processed by the Director of Finance.

Having reviewed this matter, we find there is no justification to find the vendor non-responsible for this award.

From: Lieutenant Joseph L. Grella, Serial No. 8280, Shield No. 390, Commanding Officer, Aviation Unit.

Subject: SOLE SOURCE JUSTIFICATION for the extension of RQPD2100076 and BPNC21000088

The Nassau County Police Department requests sole source approval for the maintenance and repair of the MX-10 Cameras and Custom designed Mission Suites by CNC Technologies that are currently on the three (3), Police Department owned, Bell aircraft through CNC Technologies.

The above listed Mission Suite was designed as a synergistic system through CNC who are the designers and have been and will be the maintainers. We are currently under contract with CNC for the maintenance and repair of our systems until July of 2026.

CNC and the county are under contract for the maintenance and repair as they were chosen for their expertise in this arena, their availability for on-site visits and response, and knowledge of our mission.

Thank you for your consideration.

Respectfully,

RE: Sole Source Justification - Five-Year Extended 24/7 Service, Support & Training
Quote NCPD002261 Rev C

Dear Lt. Grella,

CNC Technologies, LLC (CNC) is a leading provider of aviation technology and wireless communications solutions for law enforcement, government, and military markets. We specialize in customized aerial surveillance, data transmission, and mission-critical video systems, all supported by comprehensive lifecycle service and training.

We are pleased to submit this justification for the sole source procurement of the Five-Year Extended 24/7 Service, Support, and Training Program for the Nassau County Police Department Aviation Unit mission systems (Quote NCPD002261 Rev C; term 05/11/2026 - 05/10/2031). Based on our unique role as the original designer, integrator, and current support provider for the Department's airborne and ground video infrastructure, CNC is the only vendor capable of delivering this scope without risk to operational readiness.

This justification is based on CNC Technologies' exclusive system knowledge and ongoing responsibility for the integrated platforms installed across NCPD aircraft, ground receive sites, mobile command vehicles, and handheld receivers:

- Wescam MX-10 imaging systems
- Aircraft mapping and DVR infrastructure
- Vislink/Troll downlink transmitters and antennas
- Troll ground receive architecture and decoders
- Mobile command vehicle receive suites
- End-to-end video network transport and control systems

Key benefits of procuring these services through CNC Technologies include:

- Original Engineering and Integration Expertise

CNC was exclusively responsible for the design and integration of the Nassau County mission suite across the Bell 429 and 407 fleet and associated ground systems. Only CNC possesses the proprietary

CNC Technologies

command & control

configuration data, encryption management, RF alignment parameters, and network architecture necessary to maintain full system performance and interoperability.

- Comprehensive 24/7/365 Support

The proposed program provides live technical support at all times, unlimited on-site service with rapid technician deployment, prioritized factory service, quarterly system evaluations, and recurring operational training. This level of coverage is available solely through CNC as the system integrator.

- Local Field Presence

CNC maintains a field representative located within Nassau County jurisdiction, ensuring immediate response and continuity with Aviation Unit personnel. This requirement cannot be met by third-party vendors unfamiliar with the system architecture.

- Operational and Training Continuity

CNC developed and delivers the existing mission system curriculum for NCPD aircrew and technicians. Transitioning to any alternate provider would introduce operational discrepancies, incompatible procedures, and unacceptable risk to mission-critical video operations.

- Proprietary System Knowledge & Warranty Chain

CNC holds direct factory relationships and authorized service pathways for all installed components. Warranty transfers, loaner equipment logistics, firmware management, and configuration control are exclusive to CNC and cannot be replicated without jeopardizing certifications and performance.

By selecting CNC Technologies, the Nassau County Police Department retains a single point of responsibility for the entire mission system. This continuity eliminates service delays, additional costs, and the operational inefficiencies associated with multiple vendors attempting to support a proprietary integrated platform.

CNC's proven track record supporting law enforcement aviation operations nationwide includes agencies such as:

New York Police Department
Broward County Sheriff's Office (FL)
Texas Department of Public Safety
Los Angeles County Sheriff's Department
Michigan State Police
Georgia State Patrol
Florida Highway Patrol
Pinellas County Sheriff's Office
