A Message from

Nassau County Executive Laura Curran

Once again it is hurricane season and Nassau’s Office of Emergency Management (OEM) stands ready to assist you in preparing for challenges we may face. Hurricane season officially runs from June through November but we should always be prepared for any type of disaster, whether natural or man-made. Using the information in this brochure, I urge you to prepare now and build your resilience, helping you and your community to be StormReady®.

A storm watch means storm conditions are possible whereas a storm warning means a storm is expected. For all hurricane watches and warnings, please take the threat seriously and follow the instructions issued by Nassau OEM and FEMA. To register your cell phone to receive emergency alert information, please go to www.nassaucountyny.gov/alert.

Nassau OEM works cooperatively with public and private agencies, law enforcement, and first responders to help protect the lives and property of Nassau County’s residents. Should the need arise to open shelters, OEM is ready to work with American Red Cross to ensure the safety of our residents and their loved ones. But our first responders can’t help you once they’re own lives are put in danger, so it is important that you follow evacuation instructions when they are issued, before a hurricane arrives.

Please use the information enclosed to check family emergency supplies, prepare “go kits” and to finalize a family plan for loved ones to follow. For more information please visit Nassau OEM at www.nassaucountyny.gov/oem or FEMA’s preparedness website at www.ready.gov.

I wish you and your family a happy and safe summer.

Laura Curran

- NICE BUS ............................................................................. (516) 228-4000
- LIRR ..................................................................................... (718) 217-5477

Before a Hurricane

- KNOW YOUR ZONE
  Find out if you live in a hurricane evacuation area by contacting your local government/emergency management office.

- HAVE A FAMILY EMERGENCY PLAN
  Before an emergency happens, decide how you will get in contact with loved ones, where you will go and what you will do. Keep a copy of this plan in your emergency supplies kit or another safe place where you can access it in the event of a disaster.

- PUT TOGETHER AN EMERGENCY SUPPLIES KIT
  Put together a basic disaster supplies kit and consider storage locations for different situations. Check emergency equipment, such as flashlights, generators, and storm shutters. For a list of key items, see the checklist provided on the next page.

- REVIEW YOUR HOMEOWNERS INSURANCE
  Review your insurance policy to ensure that you have adequate coverage for your home.

- UNDERSTAND THE DIFFERENCE BETWEEN WATCHES AND WARNINGS
  A hurricane watch means that hurricane conditions (sustained winds of 74 mph or higher) are possible within your area. A watch is issued 48 hours before the anticipated tropical-storm-force winds. A hurricane warning means that hurricane conditions (sustained winds of 74 mph or higher) are expected somewhere within the specified area. A warning is issued 36 hours in advance of tropical-storm-force winds.
Is your go-kit ready?

Family Go-Kit

- First aid kit. Pack a “how to” guide as well.
- Cell phone and charging accessories.
- Essential prescription and non-prescription items and medical information.
