or [ddentici@uvbh.com](mailto:ddentici@uvbh.com)

- Basic training in the building sciences of home performance and weatherization in the green industry field
- A 10-hour entry level OSHA certification training
- Introduction to construction site math, tools and blueprints
- Trainings held at United Way's E3 SmartBuild Training Center (Energy/Efficiency/Education) in Deer Park, a state of the art facility equipped with the latest technology
- Trips to home construction site, time/conditions permitting
- Course includes sessions on social media skills, financial literacy, workforce readiness, resume and job search techniques

VetsBuild graduates who intend to work in the Green Construction/Energy field will have an opportunity to apply for subsequent advanced certification classes. Application, interview and staff approval required.

- Building Performance Institute (BPI) Certification: Energy auditor training that includes combustion safety, blower door testing and energy analysis
- Gas Pro: Comprehensive training on how to become a skilled technician working with natural gas and natural gas appliances. 14-week course. Exam required for certification
- OSHA 30 for project management careers
