

Appendix 1-1

Support Letters

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Lynn M Porter Bernadotte

These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

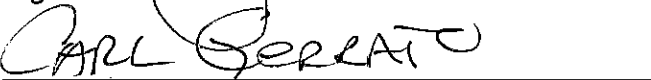

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

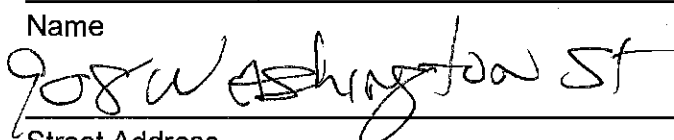

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

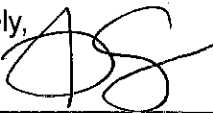

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

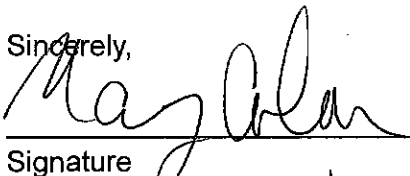

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

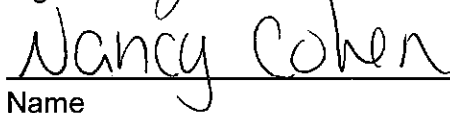

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

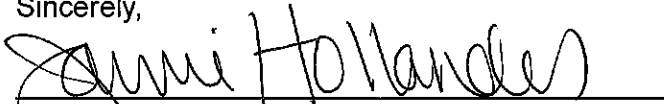

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

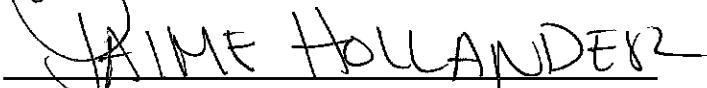

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

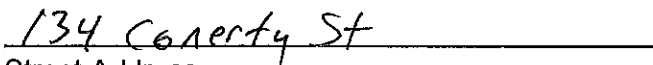

Sincerely,

Signature

The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

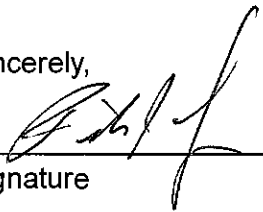

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

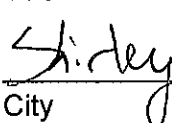

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

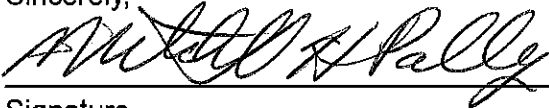

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Signature

These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Ann Ruess

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

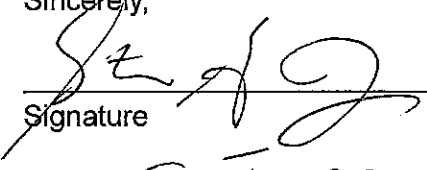

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Albertina Mendez

Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

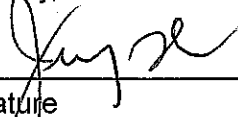

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

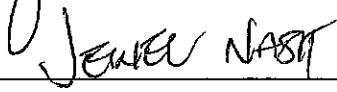

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

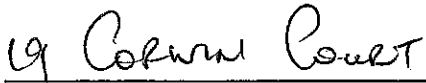

Sincerely,

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

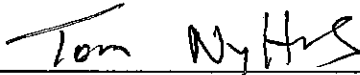

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

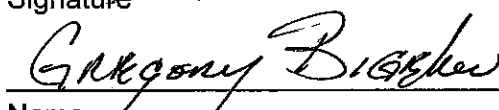

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

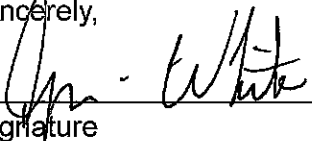

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

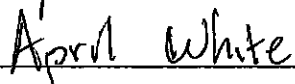

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

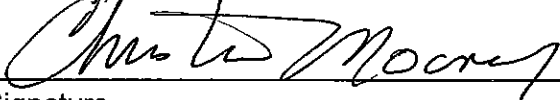

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

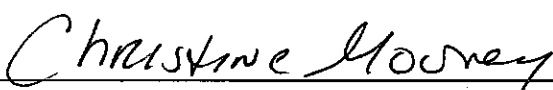

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

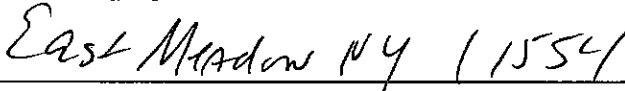

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
brian farrell

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Tsz Lun Man

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Christen Winkler

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Essential Infrastructure Alliance

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Krystal De La Cruz

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Allen Foley

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Joyce Harvey

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Joe Dazzo

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
John Skelly

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Hopeton Hendricks

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Sharon WilliamsMcCrimmon

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Juana Devito

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Jack James

The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Matthew GAETA

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Barbara Franco

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Henry Vincent

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Stephanie Gonzalez

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
ian minerve

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Stephen Edelman

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Michael Stashin

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Scott Kaiser

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Luis Vazquez

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Joe Dazzo, Jr.

It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Mike Pantano

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Audrey Landsberg
Great Neck

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Rich Carpentier

The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
donald gelestino

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Dan Camarda
Suffolk County/Nesconset

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Sahar Malik

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Kenneth Ware

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Shari Nastasi

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Marsha Mills

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Marie Amazan

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Aaron Jenkins

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
April White

The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I am particularly impressed by the proposed \$150 million investment in critical infrastructure upgrades. These investments, including the modernization of the Meadowbrook Parkway, the construction of a new water well for Uniondale, and the upgrade of the local electric substation, will directly address long-standing community concerns about traffic congestion, water sustainability, and energy needs.

Beyond the immediate infrastructure benefits, Sands' substantial financial contributions to Nassau County and surrounding communities will fund essential services, education, and local businesses. The projected annual tax revenue of over \$563 million will provide significant funding for infrastructure, schools, libraries, parks, not-for-profit agencies, and public safety. This investment will ensure a brighter future for generations of Long Islanders.

We cannot miss this opportunity to create jobs, boost our economy, and revitalize Nassau County. I wholeheartedly support the Sands project and commend the thoroughness and investment in our communities that the DEIS demonstrates. I urge you to complete the Final EIS and the environmental review process without delay.

Sincerely,
Gary Humbert

Dear Clerk of the Nassau County Legislature,

I am writing to express my strong support for the proposed Sands New York project in Nassau County. Sands' recent submission of the Draft Environmental Impact Statement (DEIS) demonstrates a commitment to modernizing our infrastructure and protecting our communities. It is now imperative that the Final EIS and the environmental review process be completed without delay in order to seize this once-in-a-lifetime opportunity to transform our region.

The comprehensive nature of the DEIS is truly remarkable. The level of detail and analysis demonstrates a deep understanding of the project's potential impacts and the steps being taken to mitigate them. It is clear that Sands has invested significant time and resources to produce this 29,000-page DEIS and ensure that this project is developed responsibly and the community is protected.

I would prefer you turn this land into a children's petting zoo, but if that's infeasible a resort casino sounds ok.

Dear all,

I would like to know how many minutes each person will have for the oral comments at the public hearing on December 9. I would love to share my comments for the creation of this excellent project.

It would be greatly appreciated to receive an answer at your convenience.

Many thanks.

Jean-Lionel Mésidor, J.D.
